

# THUẬT TOÁN CHUYỂN BÀI TOÁN QUI HOẠCH PHI TUYẾN VỀ BÀI TOÁN QUI HOẠCH TUYẾN TÍNH

Nguyễn Hữu Công

## TÓM TẮT:

This paper proposes a method used to convert nonlinear programming problem into linear programming problem. A new algorithm used in this paper can support for programming more easily, and calculating time is shorter. This is very significant in science in general and in automation control in special and open the applying capabilities in practice
