

NHẬN DẠNG ĐỐI TƯỢNG PHI TUYẾN BẰNG HỆ MỜ-NORON

Lại Khắc Lãi, Phạm Văn Thịnh, Nguyễn Ánh Dương

TÓM TẮT:

Integration of fuzzy logic and neural network in the Fuzzy-neural system enables us to promote abilities of both. The paper proposes a method to build fuzzy-neural identification to identify nonlinear plants which have many inputs many outputs (MIMO). The imitating results for robot arm display the advantages and possibilities of this new one.
